

What challenge are you facing?

Need vacuum compatibility?

1 Vacuum Port (KF25 Flange)

Powder absorbs moisture?

2 Air Purge Port

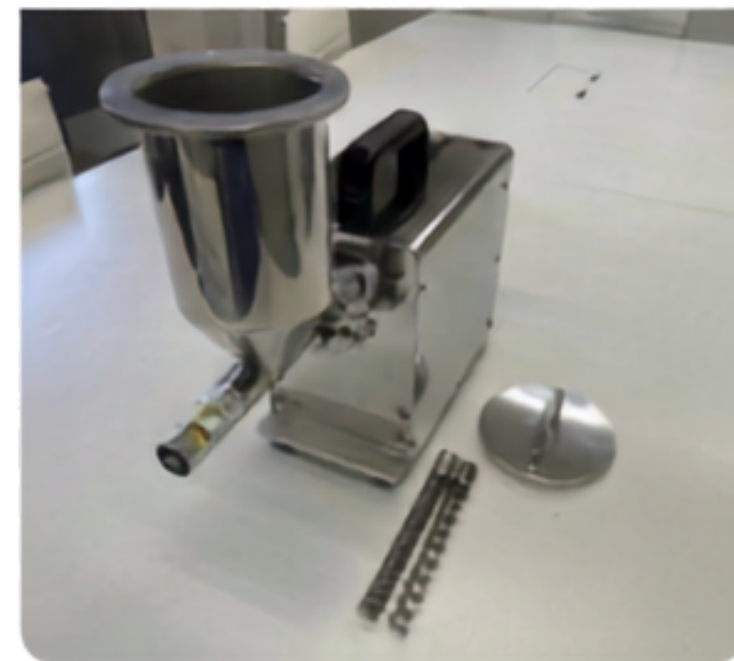

Need a longer discharge reach?

3 Extended Screw

Handling corrosive powder?

4 SUS316L

Benefit

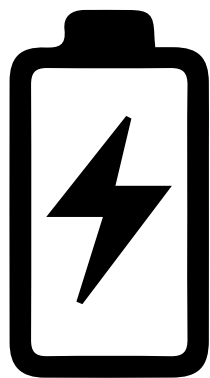

Standard vacuum connection for glove boxes and vacuum chambers.

Keeps powder dry with nitrogen or dry air purging.

Extends the discharge point to suit your equipment layout.

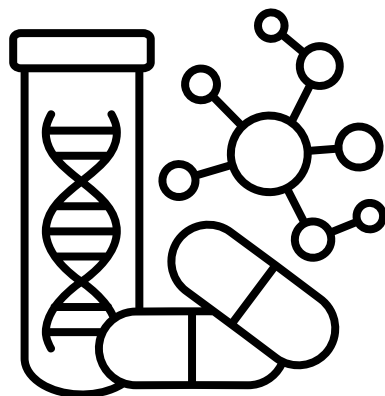

Improved corrosion resistance for demanding applications.

Industries We Serve

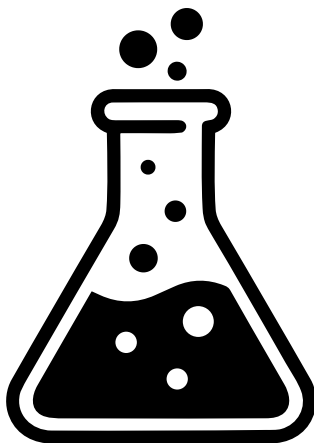

Battery

Moisture protection
sealed feeding,
corrosion resistance

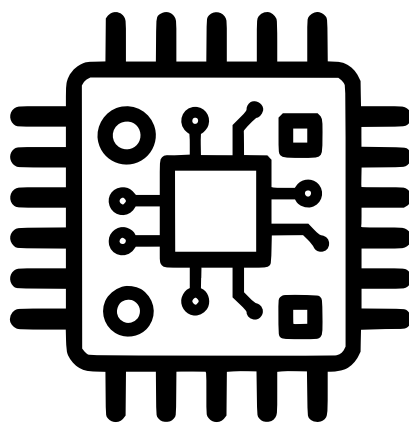

Pharmaceutical

Hygienic design,
SUS316L, easy cleaning

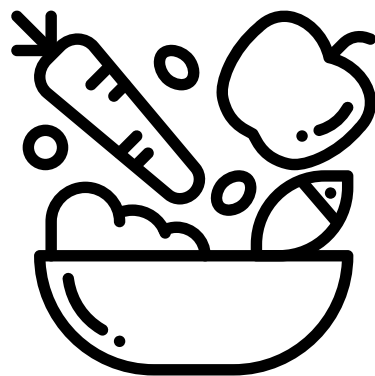

Chemical

Corrosion resistance
custom layouts

Semiconductor

Vacuum compatibility
glove box integration

Food

Hygienic materials,
stable feeding

SEIWA GIKEN’S SCREW FEEDER

A compact and lightweight screw feeder that ensures consistent powder feeding performance. Its simple structure allows for easy disassembly and cleaning.

Key Features

Compact Design

Space-saving and
easy to integrate

Easy Cleaning

Simple disassembly
for quick cleaning

Stable Feeding

Consistent and
reliable performance

Versatile Use

Suitable for a wide
range of powders
